

**A 50 YEAR VISION FOR THE
WILDLIFE AND NATURAL HABITATS
OF HERTFORDSHIRE**

(A Local Biodiversity Action Plan)

Prepared by

Herts & Middlesex Wildlife Trust

April 1998

ACKNOWLEDGEMENTS

Many people have contributed comments and ideas to this Action Plan, in particular colleagues in the Hertfordshire Environmental Records Centre, local authorities, nature conservation organisations, English Nature and the Environmental Agency, as well as a large number of individuals. A document such as this could not be put together without a great deal of co-operation and constructive criticism. The Trust wishes to thank everyone who has contributed and hopes that they will enthusiastically implement the Action Plan.

COMMITMENT TO THE PLAN

The wide consultation process has ensured a high level of commitment to implementing this Action Plan. The organisations listed under each action are those who are best placed to implement the action within their own work programmes. Many organisations are already implementing actions or have committed themselves to do so. A formal “signing up” ceremony in the autumn / winter of 1998 will confirm the commitment of each organisation to endeavour to implement the specified actions. It is acknowledged that this will be a statement of intent rather than a binding agreement.
